SUMMARY

B.Tech 🎓 Computer Science student with hands-on experience in full-stack web development. Built projects including a Fake News Detection system using NLP and a real-time chat platform with live room features. Skilled in React, Node.js, and modern web technologies, with a focus on developing scalable and user-centric applications.

EDUCATION

2026 Nashik, India	B.Tech in Computer Science Engineering 2022 - 2026 CGPA:- 8.33
2020 Nashik, India	SSC Ravindranath Vidyalaya, Nashik 74%
2022 Nashik, India	HSC LVH Collage, Nashik 55%

TECHNICAL SKILLS

Languages JavaScript, Python, Java	Frontend React.js, HTML, CSS, Tailwind	Backend Node.js, Express.js
Database MongoDB	ML NLP, TF-IDF, Scikit-learn	

PROJECTS

Fake News Detector

Summary

A machine learning-based web application that classifies news articles as real or fake using Natural Language Processing (NLP) techniques.

Details

- Developed an end-to-end NLP pipeline to analyze and classify news content
- Performed text preprocessing including tokenization, stopwords removal, and TF-IDF vectorization
- Trained classification models such as Logistic Regression / Passive Aggressive Classifier for prediction
- Implemented a system that takes user input (news text) and outputs authenticity results
- Focused on improving model accuracy and understanding of feature extraction techniques

Tech Stack

Python, Scikit-learn, NLP, TF-IDF

Key Features

- Real-time news classification
- Text preprocessing pipeline
- ML-based prediction system

Connectify– Real-Time Chat & Live Room Platform

Summary

A real-time communication platform that enables users to connect based on shared vibes and interact through chat and live rooms, enhancing social engagement and community interaction.

◇ Details

- Developed a chat-based web application with support for real-time communication features
- Designed a “vibe-based” interaction concept to connect users with similar interests
- Implemented live room functionality to allow multiple users to join and communicate simultaneously
- Built reusable and scalable frontend architecture using React.js
- Ensured responsive UI for seamless experience across devices
- Deployed application using Vercel for fast and reliable performance

◇ Tech Stack

React.js, Tailwind CSS, JavaScript

Portfolio Website

Created personal portfolio to showcase projects and skills with responsive design.

Certificates

Web Development Training –

Coincent (Online)

- Completed structured training covering HTML, CSS, JavaScript, and modern web development practices
- Gained hands-on experience in building responsive web applications
- Learned fundamentals of frontend development and project deployment
